

ARCHITECTS OF THE TWENTIETH CENTURY:

REVOLUTION! In the 19th century, the Industrial Revolution set the architectural world on a rampage of invention and audacity: materials of unbelievable strength made possible structures spectacularly tall and slender, in pristine elegance. That design momentum continued in the 20th century with the Bauhaus and giants like Frank Lloyd Wright, Walter Gropius, Mies, and other geniuses of architecture. Come to these illustrated lectures and watch the progress of Architects of the 20th Century.

Art Nouveau

Antonio Gaudi
Hector Guimard
Victor Horta

The Bauhaus/Modernism

Walter Gropius
Mies van der Rohe
Le Corbusier
